Summary

Full Stack Software Engineer with 4+ years of experience - owning the end-to-end software development lifecycle. Most recently at **Ernst & Young** delivering production-grade solutions across **Fintech, Healthcare, Legal, Education, and Telecommunication** domains. Specialises in the full product lifecycle — distributed microservices and REST APIs in **Java 21 + Spring Boot** through to polished **Angular 18** frontend and cross-platform mobile apps **Ionic/Cordova** with biometric security. Delivered a **40% reduction in infrastructure costs** via legacy-to-cloud migration, recognised with multiple engineering excellence awards.

Technical Skills

- **Backend** - Java 21, C# (.NET), Python, Spring Boot, Spring MVC, Spring Security, Microservices, REST APIs, Hibernate, JPA, JWT, OAuth 2.0, SAML, JUnit 5, Mockito, AI/ML Integration (OpenAI API, LangChain4j).
- **Frontend** - Angular 19, React 18, TypeScript, HTML5, SCSS, RxJS, NgRx, Ionic, Cordova, Thymeleaf, Jasmine, Karma.
- **Databases** - PostgreSQL, MySQL, MongoDB, DynamoDB, Azure SQL).
- **Cloud & DevOps** - AWS (EC2, Lambda, S3, SES, CloudWatch), Docker, Kubernetes, Docker Compose, CI/CD, Azure DevOps.
- **Mobile & Desktop** - Cross-Platform, (Ionic/Cordova), ElectronJS, Xcode, Android Studio.
- **Tools** - IntelliJ, VS Code, Postman, Swagger, Git, Bitbucket, Jira, Powershell.

Experience

Ernst & Young (EY GDS) | Associate Software Engineer Sept 2023 – Jan 2026

- **Microservices & secure APIs at global scale:** Designed and delivered RESTful **microservices** using **Spring Boot**, implementing multi-level authentication and custom **Spring Security** filters for a multinational healthcare client using **Java 21**, serving end-users across **140+ countries**.
- **Engineered a reusable header/footer UI component:** using Java Spring Boot and Thymeleaf, standardising branding and navigation across 5+ enterprise web applications and eliminating redundant frontend setup per deployment.
- **Customer-facing cross-platform app:** Developed a localized **cross-platform application** (iOS, Android, Web) for a major telecom provider using **Angular 18 & Ionic**, implementing secure **third-party payment** integrations, **biometric face authentication** & robust error-handling workflows.
- **Database optimisation at scale:** Optimized **PostgreSQL** and **DynamoDB** schemas to support high-concurrency healthcare systems, resolved production performance bottlenecks using **CloudWatch**, and scripted CI/CD deployment pipelines using Bitbucket and Azure DevOps to streamline releases and improve deployment efficiency.
- **Quality & reliability:** Increased Sonar code coverage and system reliability through comprehensive test suites (JUnit 5, Mockito). Collaborated with stakeholders in Agile sprints — requirements gathering, demos, and sprint planning.

SentientGeeks | Junior Software Engineer July 2022 – July 2023

- **High-concurrency REST APIs:** Engineered high-concurrency REST APIs using **Java 18, Spring Boot**, and **Azure SQL** for user management, multi-parameter search, and asynchronous notifications with server-side sorting, while managing code releases using **GitHub**.
- **Desktop productivity tool (.NET + Electron):** Engineered an offline-resilient **desktop application** using **Electron.js, Angular 15** and **JIRA APIs** to automate productivity tracking, implementing system-level hooks for activity monitoring robust sync engine and release builds using electron-builder.

Xelpmoc Design and Tech | Junior Software Engineer Aug 2021 – June 2022

- Engineered an automated legal **search engine** that processed large-scale PDF repositories into searchable text formats, implementing efficient data extraction using **Angular 13**.
- **React application:** Developed a school management platform with Role-Based Access Control (RBAC) and complex scheduling algorithms, implemented secure multi-level authentication for teachers, principals, and students using **React 17**, and containerized/deployed application services using **Docker**.

Education

Bachelor of Technology (BTech), Computer Science & Engineering 2016 – 2020
[Maulana Abul Kalam Azad University of Technology](#) [Formerly - West Bengal University of Technology]
Kolkata, India
